Cradle to Cradle Certification of Flocart

I can confirm that Flocart has been working with the C2C Platform to achieve C2C certification of the following products: 0952 Technic / 1150 Technic / 07642 Technic / 07642 NOX.

The certification application is due to be made imminently and the expectation is that Flocart will qualify for **C2C Certification, level Bronze.**

As a Cradle to Cradle Certified assessment body, C2C Platform works with product manufacturers to achieve Cradle to Cradle certification by partnering with them to assess a product's performance according to Cradle to Cradle Certified Product Standard requirements. C2C Certificates are awarded by the non-profit foundation Cradle to Cradle Products Innovation Institute.
