UPCYCLING PLASTIC INTO PREMIUM YARN

high performance recycled yarn to support your sustainability projects.

Nature is hanging by a thread, We want it to be sustainable.

NewLife™ goes beyond recycling. NewLife™ is Upcycling plastic into premium yarn.

Follow the filament that binds performance and respect for the environment. NewLife™ creates a circular economy that significantly reduces ecological impact.

NewLife™ respects nature by preventing plastic contamination.

NewLife™ yarn guarantees the same level of performance and quality as a virgin yarn. Thanks to its unique production process, NewLife™ contributes to a significant reduction in CO2 emissions (-32%) which impact global warming, while also ensuring water (-94%) and energy savings (-64%).

LCA issued by ICEA

follow the upcycled yarn

The path to sustainable quality.

NewLife™ is the result of a unique and certified system capable of intercepting plastic bottles immediately after consumption in order to avoid deterioration of PET plastic.

NEWLIFE

follow the upcycled yarn

The path to sustainable quality.

NewLife™ is the quality filament that originates from recovered plastic and finds its application in premium, high performance fabrics.

A path always traced.

Following NewLife™ yarn is simple because it contains an exclusive technology that allows, for quality purposes, those who choose it to recognize and verify its presence in the final product.

APPLICATIONS

NEWLIFE

01

Request a fabric certification form. Complete the request form and return it to us.

02

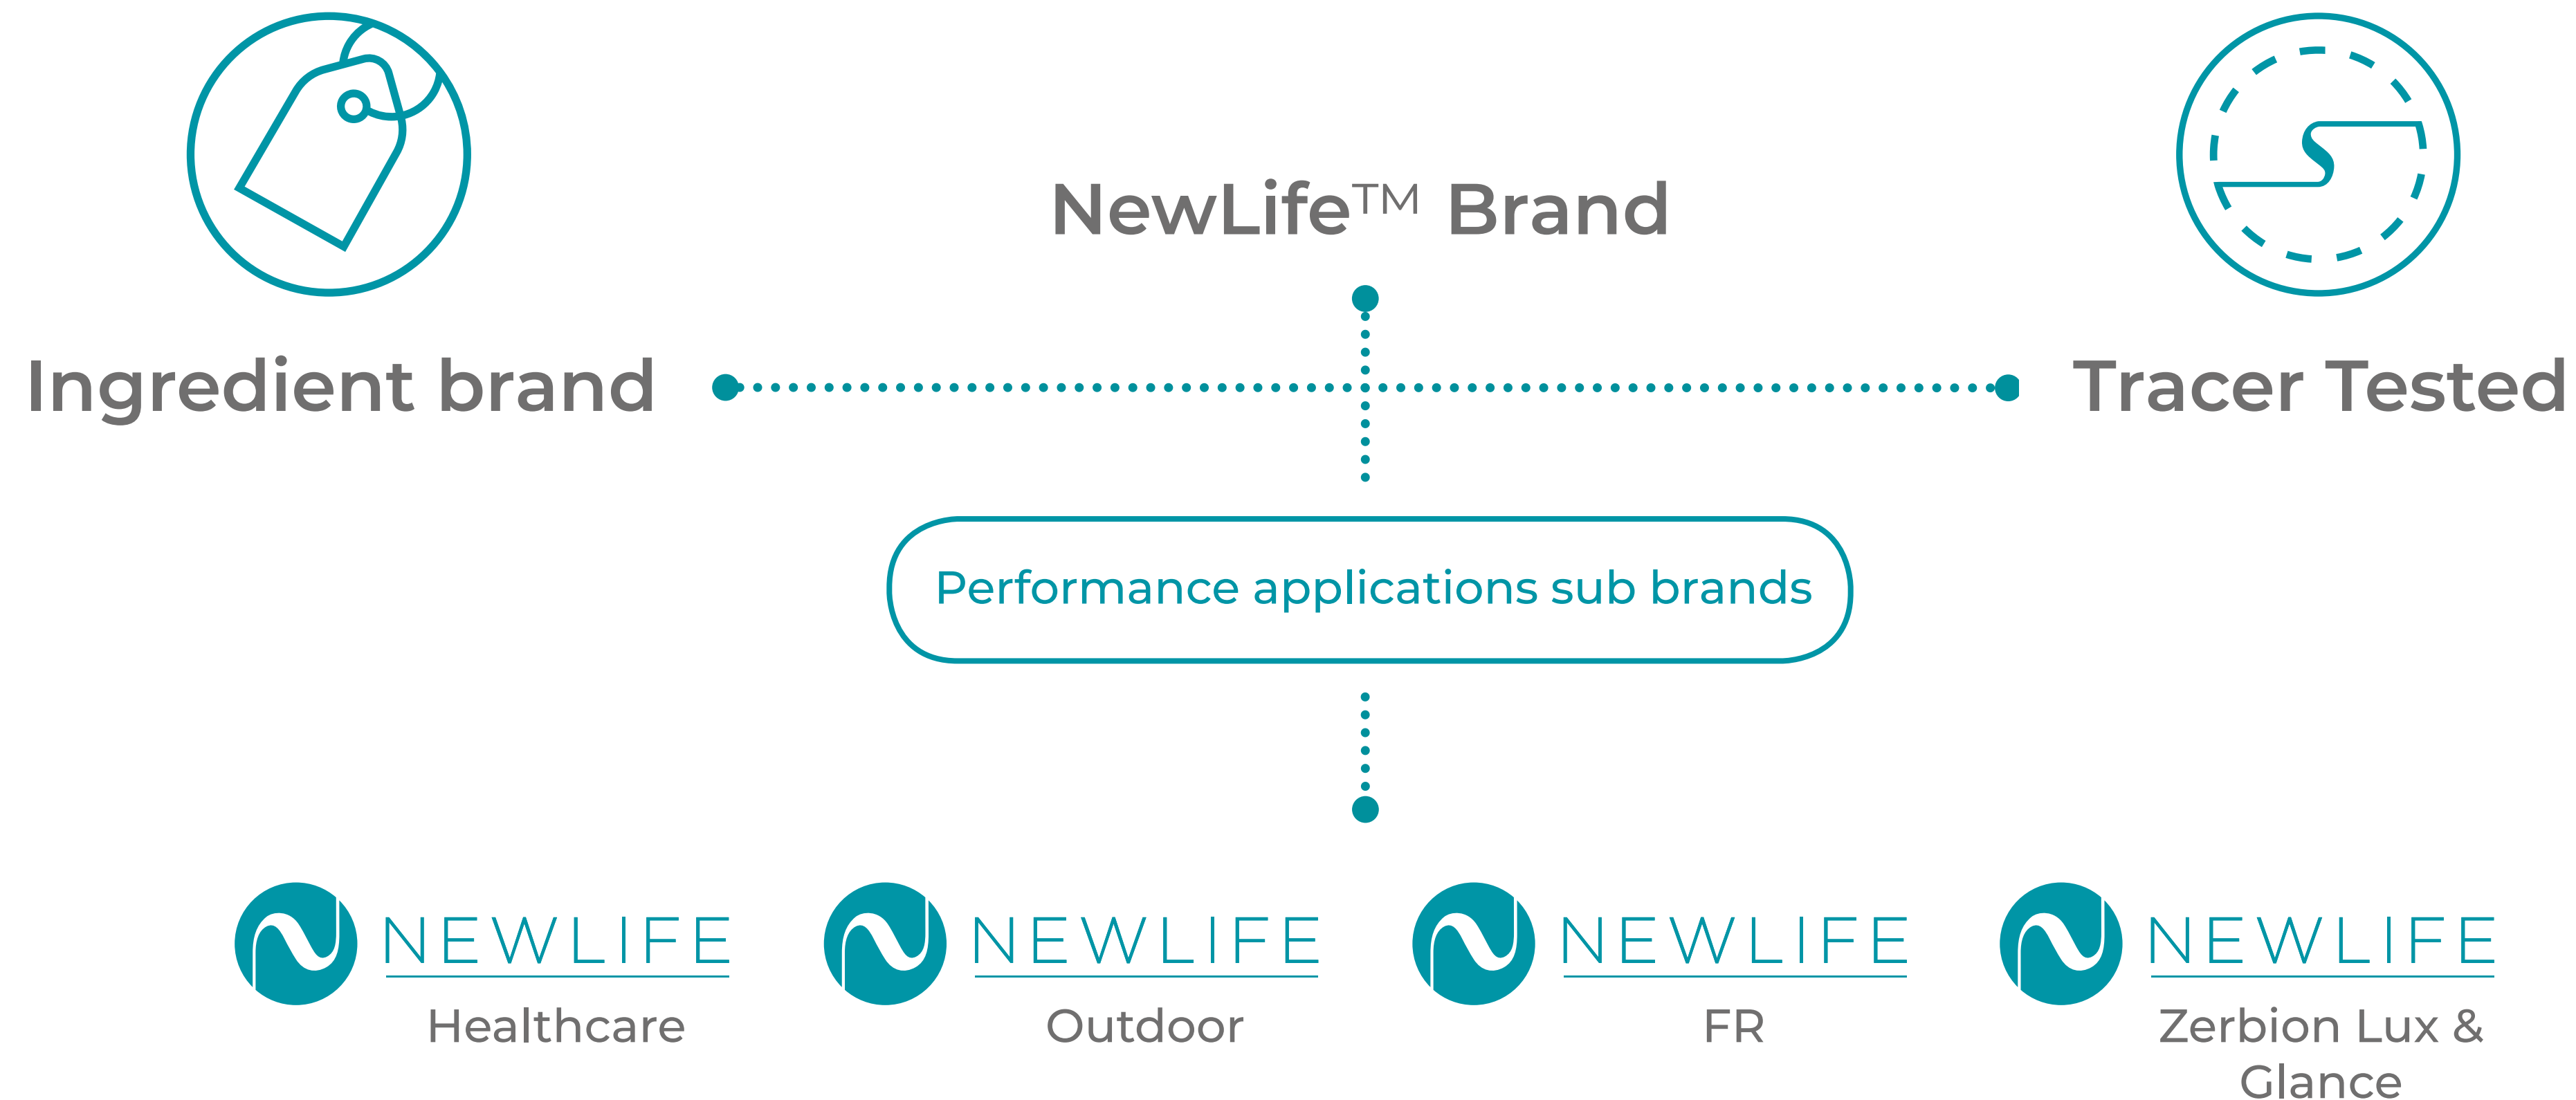

We'll Review the form and send you a confirmation email.

03

Mail two meters of your fabric, labeled with your Newlife brand ID number, to the address shown on your confirmation email.

04

Test & Certified your fabric to determine if it qualifies. If successful, we'll issue you with an official Notification of Approval with the Brand Policy Certification letter including the accreditation number.
